

the first social media app for dogs

Welcome to DogChat

If you are new to
DogChat you can
create your
account here.

Create account

If you already
have an account
you can access it
from here.

Login

Story 1

So the user would go on the page, and he would have two options:

1.) Create account- If the user came here for the first time he has the option to create an account by clicking on the button Create account which will go to the page create account.

2.) Log in- If he is already a user of DogChat he can click on the button Log in and it will go on the page where he can log in.

Date of birth

[Create account](#)

Story 2

So the user wants to create an account. There are some things that need to be fulfilled.

1.) There are 4 things that need too be filled in that have an * infront of the boxes (Username, Password, Name and D-mail) and date of birth and breed which are optional.

2.) If the user dosen't fill in the Username he would have a error and a pop up which will notify him "You need too fill this in". Also if the Username is already taken it would also show an error and a pop up which will notify him "The username is taken please chose another one".

3.) When everything is filled in correctly he can click Create account which will lead him on the log in page.

[Forgot username/passowprd?](#)

Story 3

So the user either created an account or already has one, but now he needs to log in. He needs to write the same username and password which he set up while creating an account.

1.) If either the username or the password don't match he would get an error to indicate one or the other is not correct.

2.) If the user forgot his Username/Password he can click on "Forgot Username/Password?" which will then lead to the page(which i do not have currently) where it will verify it is him.

3.) And if he came here by mistake, but in fact he is a new user he can then click "New user" and it will go to the page where he can create a new account.

New post

I'm really hungry for a treat rn

Unsend

Story 4

So if the user wants to add dogos he can click on the search bar and type their name.

1.) When typing e.g. Fido it will search all the user that have the same or similar name. If the users are friends it will have next to it a small box where it is written friends, and if not it will have the option to add the dogo and with it how many mutal dog friends they have.

2.) If the user have similar friends e.g. 20 mutual friends there will also be Dogos you might know where they can also add them as friends.

3.) If the user clicked the add dogo it will send a request and it will say Request sent and also the user has the option to Unsend the request. Then the

Story 5

In this story we have the profile of user Doge. Let's say that the user Doge went to see his profile.

- 1.) On his profile we can see a couple of things his profile picture, his name, his posts, etc...
- 2.) Doge has the option to access to see/post his feed, see/post his pictures and see all of his dogo friends. He also has a box under the profile picture where he can per say write something about him self or as he has written what he likes memes, Elon Musk, doge coin.
- 3.) We can also see that he gets a pop up notification. By clicking on it they can see what the notifications are in this case it is a friend request. He can then accept the dogo or decline.

Story 6

Let's say Lucky forgot his username or password what can he do now.

- 1.) First of when he types the wrong username or password he would get an error saying its wrong. He can then click on Forgot username/passoword where it will take him to reset his username/passoword.
- 2.) He now needs to type his D-mail where it will send a meesage to his D-mail telling him his username and sending him to the page where he can now change his password.
- 3.) He now needs to type his username and a new password. After thats completed he gets a pop up that says that he has successfully changed his password and now he can log in again.
